

GIANNA ROGARI

Project Estimator

After going to school for architecture, Gianna found a love for the financial side of construction management. While working for INTECH, she was put on an estimating rotation and found her passion doing a variety of projects that allowed her to see beyond what goes into construction. She enjoys both the art and the science of estimating in the true B&F spirit—going beyond a simple take-off and not just bidding from what you can see in the drawings. Gianna embraces technological advances in estimating to guide her clients and provide the most up-to-date cost information at a fast pace.

Gianna enjoys learning on the job, working on a variety of projects, and collaborating with many types of people. While she has completed estimates for varied clients, some of her favorite projects are historical renovations. She enjoys being a part of stewarding these buildings forward and continuing their legacy.

SELECTED PROJECTS
